HDFC BANK

HDFC Bank's CSR initiative, Parivartan, is deeply committed to making a positive impact on the environment and the community at large. We partner with grassroot organisations to enable socio-economic development in the lives of millions of Indians through multisectoral initiatives under our 6 key focus areas. This year, we have positively impacted **10.77 crore** lives pan-India.

ENHANCEMENT

SKILL TRAINING & LIVELIHOOD ENHANCEMENT

Sustainable independence relies on long-term opportunities. We offer vocational training and entrepreneurship support to bridge the skill gap, helping individuals create economic security for their communities.

PROMOTION OF EDUCATION

True learning thrives in environments designed for growth. Our initiatives modernise education through training, scholarships, and upgraded facilities, equipping students to innovate and lead.

HEALTHCARE & HYGIENE

A healthier nation creates a stronger future. We strengthen rural healthcare infrastructure and promote preventive hygiene, bringing essential medical care directly to underserved communities.

SOLUTIONS

NATURAL RESOURCE MANAGEMENT

Prosperity must coexist with nature. We focus on water conservation, soil health, and climate-smart agriculture to ensure long-term resource productivity and environmental protection.

P1405

BORDER RESILIENCE: BALANCING GREEN ENERGY AND CIVIC HARMONY

| District: Bishnupur

Geographical isolation and limited civic utilities frequently restrict public health, learning standards, and steady market commerce across northeastern frontier settlements. To establish climate-resilient village infrastructure, **HDFC Bank Parivartan** and the **People to People Health Foundation** are driving a multi-sectoral development programme across 15 villages in Assam and Manipur. The project is currently converting four traditional schools into digital smart facilities, establishing modern libraries, and refurbishing regional *anganwadis*. Simultaneously, the intervention is upgrading medical centres in six villages, constructing community toilets, and erecting roadside commuter shelters. To foster sustainable growth, the initiative is also installing solar-powered water filtration towers and reviving rural marketplaces to bolster local trade.

P1025

RENEWING HILLSIDE SCHOOLS

| District: Chandel

Targeted upgrades in energy grids and public infrastructure offer a strategic pathway to enrich learning experiences and foster highly secure, resilient spaces. To upgrade public facilities and household energy access, **HDFC Bank Parivartan** and the **Sunbird Trust** partnered to implement an educational and community transformation project. The collaborators refurbished 12 government schools in Assam and Manipur by modernising classrooms, upgrading sanitation units, and installing classroom furniture. Simultaneously, the initiative deployed solar-powered streetlights across 12 rural villages to secure public spaces after dark. The project also distributed 3,895 solar lamps to households, enhancing evening domestic lighting for students and families.

DEPLOYING DECENTRALISED SOLAR INFRASTRUCTURE

| Districts: Churachandpur, Noney, Pherzawl, Tengnoupal, Ukhrul

Deficits in reliable electrical grids and a reliance on conventional cooking fires caused indoor air pollution and restricted economic opportunities for rural women. To establish sustainable energy alternatives and foster gender-inclusive livelihoods, **HDFC Bank Parivartan** and the **Social Work and Research Centre** completed a Holistic Rural Development Programme. The partners trained 30 local women as specialised solar engineers and established five rural electronic workshops. Additionally, the initiative deployed solar home lighting systems and torches to 500 households, while installing solar streetlights across 50 public spaces, successfully mitigating household pollution for over 500 families.

P0872

WOMEN-LED RURAL ELECTRIFICATION AND CLEAN ENERGY ACCESS

BENEFICIARIES: 30 Solar Mamas

LOCATION: Noney, Churachandpur

THE PROBLEM

Remote villages in Manipur faced acute energy poverty due to difficult terrain, poor connectivity, and regional security challenges. Lacking reliable grid electricity, households relied on expensive, unsafe kerosene and disposable batteries. Furthermore, local rural women had virtually no access to technical training, formal skill development, or independent livelihood opportunities.

OUR INTERVENTION

To improve clean energy access and build local capacity, **HDFC Bank Parivartan** partnered with **Social Work and Research Centre (SWRC)**, Tilonia to deliver intensive residential training in solar engineering to 30 rural women. The project

distributed 500 solar home-lighting systems and 500 solar torches, installed 50 solar streetlights for public safety, and established Rural Electronic Workshops (REWs) managed by the trained women to provide local maintenance and repair services.

THE OUTCOME

The intervention electrified 500 households and illuminated public areas across 17 villages, eliminating reliance on kerosene and enabling children to study after dark. The 30 solar mamas gained vital technical skills and sustainable livelihoods through the REWs, creating a self-sufficient, community-led model for clean energy maintenance and women's empowerment in off-grid regions.
